INTRODUCTION

This set of population reports was produced by the Planning and Development Department, Regional Plan Division, to compliment reports produced by the Ministry of Revenue, Assessment Division. The purpose of the exercise is to extend valuable information gathered annually by the Ministry by reformating basic census data into geographic areas of interest to Regional and Municipal Planners. Other researchers, particularly those with an interest in human service operations and planning, will find the reports useful, providing their areas conform to planning units. These units are called Planning Divisions and Neighbourhoods and are illustrated on maps preceeding each section.

Reports have been designated to summarize specific combinations of age and sex by location, however, a computer file is also maintained as part of the system which can be used to produce other combinations. Those interested should contact the Regional Plan Division.

The tabulations in this report are organized into three sections as follows: Section 1 deals with Regional and Municipal totals, including a division between upper and lower escarpment in Hamilton; Section 2 groups Planning Divisions; and Section 3 groups Neighbourhood totals.

The data base for population figures recorded in this publication originates from the Ministry of Revenue's annual enumeration conducted in September. File copies are obtained by the Planning Department for the purpose of generating reports. These files are considered confidential by the Ministry, and are released for planning purposes with the understanding that no data will be released to the public, unless it has been aggregated so as not to identify individual records.

Where a comparison can be made, the user will note minor variations to information released earlier in October by the Ministry of Revenue. Census enumeration data is stored by Revenue on master files that undergo continuous routine maintenance. As the master file ages the census data is subject to change. Since Revenue reports from a file created in early October and Planning uses one created at the end of the year, the results will differ. Revenue's figures should be used whenever possible, however, most tabulations in this report are unique. The following listing illustrates the differences by municipality in 1977.
